Hepa+ MP: global liver and gall bladder health

Liver health

Milk thistle
(rich in silymarin)
to support liver cells[1]

Lecithin
to promote the bioavailability of silymarin[2]

Zinc-methionine
(a SAMe precursor) to support healthy liver function[3]

Vitamins and antioxidants
to limit the deficiencies associated with liver issues[4]

15 mg/kg of silymarin

And more

Fumitory
to support gall bladder function[5]

Brewer's yeast products
(sources of prebiotics and nucleotides) to strengthen the balance of the intestinal microbiota and natural defences[6]

1 capsule per day for 5 kg

When to use Hepa+ MP?

› To support liver and gall bladder health, as a single course or for long-term use

UK_BRO_GAMDIG_03_04/25

Why recommend Hepa+ MP?

Global care

- Vitamins and antioxidants for associated deficiencies
- Brewer's yeast for the intestinal microbiota

Easy

- Easy-to-give capsules that can be opened over food
- 1 capsule per day for 5 kg

Natural health

- The combination of fumitory for biliary health and the 2 most widely used ingredients for liver health: silymarin highly concentrated and zinc methionine (SAMe precursor)

Fiberact®: to support the intestinal transit

Blond psyllium*

Rich in **non-fermentable soluble fibres**
Can absorb up to **40 times** its own weight in water[7]

1 teaspoon per day per 10 kg
Add directly to food
If necessary, sprinkle with water to make it easier to set

Fiberact® reduces the signs associated with difficulties in passing stools in dogs and cats

*Powdered psyllium husk (*Plantago ovata*)

Proven benefits[8]

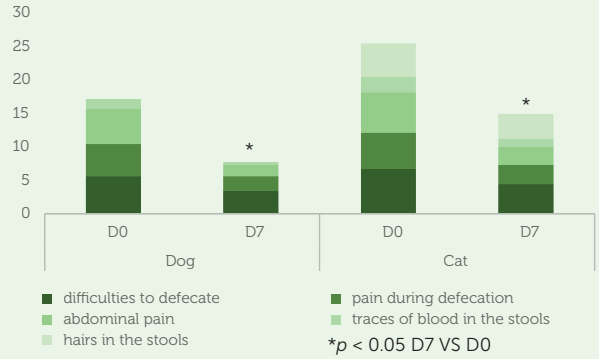

Materials and methods:

- 44 dogs and 46 cats with a faecal score of 4 or 5/5 (clearly defined form with visible cracks or hard, dry, crumbly stools that are difficult to pass)
- Fiberact® 2 g per 10 kg per day for 7 days

Results:

- Visible response in less than 4 days for more than 90% of animals
- Statistically significant reduction of the slow transit signs ($p < 0,05$)
- Easy-to-give for 82% of dog owners and 70% of cat owners

Evolution of the signs in dogs and cats with slow transit and receiving oral psyllium supplementation

*$p < 0.05$ D7 VS D0

When to use Fiberact®?

- Supports intestinal transit in case of slow transit (low-fibre diet, stress, obesity, lack of exercise, anal sac issues, etc.) or hard stools
- Helps to reduce hairballs, or limit their formation during moulting in cats
- Contributes to enhance the consistency of the stools when they are loose

Why recommend Fiberact®?

Proven activity

- Regulates intestinal transit in case of hard or soft stools
- Helps evacuate hairballs

Convenient

- Easy to measure with powder
- Easy-to-give product

Rapid effect

- Fast and visible benefits
- No need to change the diet
